

Deliverable D3.13 Evaluation of Data Access Policy

Access to the data collected through PIONEER is crucial to realise the impacts of the project. PIONEER is fully committed to sharing the PIONEER database to all participants in the project based on the policies and procedures set out in the Data Sharing/Usage Agreements that are in place with each participant. Access to the Data Catalogue will be made available/accessible to PIONEER members/participants, while preserving the integrity and confidentiality of the data sources.

In order to ensure transparency, PIONEER will also put in place a Data Access Policy to ensure the following points:

1. PIONEER respects the importance of preserving patient privacy and following the regulations as outlined in GDPR and local regulations
2. PIONEER is in the process of engaging with Associated Parties to facilitate access to de-identified patient data through a number of channels and promote their use for Research
3. PIONEER is putting in place Data Sharing/Usage Agreements to ensure that the data is only used for appropriate research purposes

All members of PIONEER agree to adhere to the restrictions and obligations outlined in the Data Access Policy and will refrain from accessing data for any other purposes.
