

Deliverable D6.3 Identification of ECPSFF members and establishment of the forum – publishable summary

Work Package (WP) 6 aims to identify and address evidence gaps which can delay decision-making by regulatory agencies, HTA bodies and payers, thus compromising timely patient access of innovative treatments for prostate diseases. To achieve this WP6 has developed a new model for multi-stakeholder dialogue by creating an Expert Committee Policy Stakeholder Feedback Forum (ECPSFF) involving the PIONEER partners and associate members, and external experts at the EU and Member State level required ensuring broad representation of the diverse models of healthcare systems in the EU and including patients and clinicians, regulators, HTA bodies and payers, as well as stakeholders involved in evidence generation. This deliverable list the identified members of this ECPSFF.
